EXPERIENCE

Sr. UX Designer II, Enterprise UX Lead | *Lucid Software, Salt Lake City, Utah* March 2020 - Present

- **AI Product Design:** Led end-to-end design for Lucid's AI-powered search from concept to launch in one quarter — an intent-aware experience that interprets natural-language queries and surfaces LLM-generated answers alongside traditional search, bringing generative capabilities into the core end-user search experience used daily across the platform.
- **Enterprise Design Strategy:** Drove Lucid's enterprise readiness by owning the UX for the Enterprise Admin Platform — roles and permissions, licensing, SCIM, security, compliance, and billing — partnering across Product, Engineering, GTM, Implementation, Support, and Customer Success.
 - Led multiple 0→1 launches from discovery through delivery — distributed admin controls with phased migration and document eDiscovery that pioneered Lucid's security & compliance offering (\$10M+ iARR).
- **Developer Platform:** Led design for service desk integrations adopted by 60%+ of enterprise accounts, streamlining how account teams manage license requests, and for service accounts enabling secure automation — simplifying technical workflows for developer-facing users.
- **Internal Tools:** Led end-to-end design for an internal billing system, restructuring a fragmented manual process into a consistent, structured workflow — improving data consistency and reducing manual input by 73%.
- **Growth & Optimization:** Lifted 7-day license approval rate by 15% (38% → 53%) by redesigning both the end-user license request flow and the admin approval flow — using rapid research, A/B testing, and in-product education to reduce friction on both sides and drive adoption.
- **Team Leadership & Mentorship:** Served as group lead for the design pod — managed three designers, established efficient workflows for pod operations, and facilitated design studio sessions to elevate design craft and the quality and consistency of team output.

UX Design Intern | *Hasbro, Pawtucket, Rhode Island* May 2019 - August 2019

- Led end-to-end design of Hasbro Pulse mobile app from 0→1, collaborating with product, visual design, and engineering to launch fan community e-commerce experience.
- Conducted stakeholder and user interviews to identify community pain points—translating business requirements and user needs into actionable product features.
- Delivered user journeys, personas, wireframes, prototypes, and design specs validated through usability testing and internal reviews.

UX Design Intern | *IBM, Shanghai, China*

June 2018 - December 2018

B2B Enterprise: IBM Solution Gateway

- Enhanced content management platform by refactoring existing functionality and designing new features based on stakeholder interviews, community feedback, and usability testing.
 - Collaborated with cross-functional team using agile development approach—facilitating Design Thinking workshops to engage stakeholders throughout the design process.
 - Applied IBM Design System and partnered closely with engineers during implementation to ensure design quality and technical feasibility.
-

SKILLS

Design & Research:

- End-to-end product design, interaction design & visual design.
- Information architecture, user flows, wireframing, prototyping & high-fidelity mockups.
- User-centered research: interviews, usability testing, A/B testing & in-product experimentation.
- Design systems, design patterns, accessibility & inclusive design.
- Design strategy, storytelling & design documentation.

Domain Expertise:

- AI product design: LLM-powered search & RAG-grounded generative answers, human-AI interaction, agentic & conversational experiences.
- B2B Enterprise & SaaS platforms, developer platforms, and internal tools; systems thinking across complex technical domains.
- SAML/SSO & SCIM provisioning for identity & access management; security & compliance; licensing & billing.

Tools:

- Figma, HTML, CSS.
- AI-assisted design & prototyping: Claude Code, ChatGPT, Figma Make, Gemini

Collaboration & Leadership:

- Cross-functional partnership with Product, Engineering, Marketing, Data Science, Implementation, Sales, Customer Success & Support.
 - Stakeholder management, design advocacy & design critique.
 - Design mentorship & leadership.
-

EDUCATION

Indiana University Bloomington, *Bloomington, IN*
Masters in Human-Computer Interaction

August 2017 - December 2019

Zhejiang University, *Hangzhou, China*
Bachelors in Landscape Architecture

August 2013 - June 2017
